LOCATION.--Lat 34°50'42", long 83°56'20", Union County, Hydrologic Unit 06020002, on right bank, 1,700 feet downstream from Arkaqua Creek, 2.6 miles southeast of Blairsville, and at mile 44.

DRAINAGE AREA.—78.6 mi².

PERIOD OF RECORD.—1942 to 1982 (operated as a continuous streamflow station), 1983 to current year.

GAGE.--Crest-stage partial-record gage. Datum of gage is 1,812.47 feet above sea level.

REMARKS.—A crest-stage gage is a device which will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from discharge measurements made by indirect measurements of peak flow or by current meter. The date of the maximum discharge is not always certain, but is usually determined by comparison with nearby continuous record stations, weather records, or local inquiry. Only the maximum discharge for each water year is given. Information of some lower floods may have been obtained, but it not published within. The years given in the period of record represent water years for which the annual maximum has been determined.
